

CARBON
STREAMING

Accelerating a Net-Zero Future

NEO:NETZ | OTCQB:OFSTF | FSE:M2Q

NOVEMBER 2023

Advisories

This presentation (“**Presentation**”) is being issued by Carbon Streaming Corporation (the “**Company**” or “**Carbon Streaming**”) for information purposes only. The content of this Presentation has not been approved by any securities regulatory authority. Reliance on this Presentation for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested.

This Presentation is not an admission document, prospectus or an advertisement and does not constitute or form part of, and should not be construed as, an offer or invitation to sell or any solicitation of any offer to purchase or subscribe for any securities of the Company in Canada, the United States or any other jurisdiction. This Presentation should not form the basis of, or be relied on, in connection with or act as an inducement in relation to a decision to purchase or subscribe for, enter into any contract, or make any commitment whatsoever in relation to any securities of the Company. No representation or warranty, express or implied, is given as to the accuracy, sufficiency or completeness of the information or opinions contained in this Presentation and no liability whatsoever is accepted by the Company, its directors, officers or advisors or any other person for any loss howsoever arising, directly or indirectly, from any use of such information or opinions or otherwise arising in connection therewith.

This Presentation contains certain forward-looking statements and forward-looking information (collectively, “forward-looking information”) within the meaning of applicable securities laws. All statements, other than statements of historical fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future are forward-looking information, including, without limitation, expectations regarding the growth of the voluntary carbon markets; future price of carbon credits and sensitivity to changes in such prices; industry conditions and outlook pertaining to the carbon markets; statements and figures with respect to the timing and estimation of future carbon credit generation, issuance and delivery and emission reductions and removals from the Company’s existing streaming and royalty agreements; statements with respect to the projects in which the Company has streaming and royalty agreements in place; the impact of regulatory developments on the Company’s streaming and royalty agreements; statements regarding the Company’s business plans and strategies; the generation of co-benefits, including biodiversity and local community benefits; the ability to acquire additional streams and/or royalties; the Company’s objectives, strategies and competitive strengths; statements with respect to the Company’s portfolio and partnership strategy; statements with respect to the timing of carbon credit sales and cash flows, statements regarding the Company’s financial future; statements regarding net asset value of the Company or comparable companies; and statements regarding valuation of the Company or comparable companies.

This forward-looking information is based on the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking information is subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. They should not be read as a guarantee of future performance or results, and will not necessarily be an accurate indication of whether or not such results will be achieved. Factors that could cause actual results or events to differ materially from current expectations include, among other things: volatility in prices of carbon credits and demand for carbon credits; change in social or political views towards climate change and subsequent changes in corporate or government policies or regulations and associated changes in demand for carbon credits; limited operating history for the Company’s current strategy; risks arising from competition and future acquisition activities; concentration risk; inaccurate estimates of growth strategy, including the ability of the Company to source appropriate opportunities and enter into stream, royalty or other agreements; dependence upon key management; reputational risk; general economic, market and business conditions and global financial conditions; and the other risks disclosed under the heading “Risk Factors” and elsewhere in the Company’s Annual Information Form dated as of March 28, 2023 filed on SEDAR+ at www.sedarplus.ca.

Any forward-looking information speaks only as of the date of this Presentation. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein. Except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise.

Delivery payment to project developers is subject to fluctuation based on the net realized price obtained on the sale of carbon credits and the terms of the carbon credit stream agreement.

The values in this Presentation are expressed in United States dollars, unless otherwise stated. Some figures presented are rounded and data in tables may not add due to rounding. All dates are based on calendar year, unless otherwise stated.

NON-IFRS MEASURES

This Presentation contains certain non-International Financial Reporting Standards (“IFRS”) measures and therefore may not be comparable to similar measures presented by other companies where similar terminology is used. These non-IFRS measures should not be considered in isolation or as a substitute for measures of performance or cash flows as prepared in accordance with IFRS. Management believes that these non-IFRS measures, together with measures prepared in accordance with IFRS, provide useful information to investors and shareholders.

Carbon Streaming Corporation

ACCELERATING A NET-ZERO FUTURE

Unique Approach to Climate Action

Successfully applying **partnership funding model** to projects in **growing voluntary carbon market**

Near-Term Organic Growth

23 carbon credit stream & royalty projects, with carbon credits received in 2023 with several projects expecting credits in early 2024

Technical and Financial Expertise

Management team has executed >\$2 B of streaming agreements; includes experts in carbon markets

True ESG Impact Investing

Strategic partnerships with project partners maximize climate, community and biodiversity co-benefits associated with streams

Diverse, High-Integrity Carbon Credit Portfolio

23 PROJECTS in 12 STREAMS & ROYALTIES covering 8 PROJECT TYPES across 12 COUNTRIES

¹ Sistem Registri Nasional Pengendalian Perubahan Iklim.

Funding the Fight Against Climate Change

SIGNIFICANT AND IMMEDIATE CAPITAL NEEDED TO ACHIEVE CLIMATE GOALS

Annual Global GHG Emissions (GtCO₂e): Significant reductions needed this decade

Sources: UNEP Emissions Gap Report 2022; Climate Action Tracker; IPCC; McKinsey & Company. Numbers may not add due to rounding.

¹ Represents unconditional Nationally Determined Contributions (NDCs) and pledges scenario.

² International Panel on Climate Change

³ Refinitiv (2022: \$1 = 0.95 euros)

- Climate change is “**widespread, rapid and intensifying**”²
- Limiting global warming to 1.5°C or even 2°C in 2050 requires **immediate and large reductions in GHG emissions**
- Need to **reduce GHG emissions nearly 40% this decade** (back to 1990 levels) to achieve Net Zero and meet 1.5°C goal in 2050
- Annual investment of **~\$9.2 trillion (7-9% of global GDP)** to achieve Net Zero in 2050
- Value of global traded regulated carbon markets was **~\$910 billion** in 2022³; voluntary markets traded **<1%** of this amount

Voluntary Markets Demand Growth Drivers

VALUE COULD POTENTIALLY GROW TO \$50 BILLION IN 2030 FROM \$2 BILLION IN 2021¹

Stakeholder Pressure: Pressure from customers, asset managers and stakeholders to address emissions

Regulatory Disclosure: Increasing climate risk disclosure requirements (e.g. TCFD, IFRS S2)

Paris Agreement: Alignment with the net-zero goal of the Paris Agreement

Technology Gaps: Limitation of technologies available to scale cost-effectively

Immediacy: Urgent action required

Voluntary Credit Demand Scenarios in 2030 and 2050¹

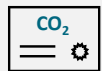

¹ Sources: Ecosystem Marketplace; McKinsey & Company; NGFS. NGFS= Network for Greening the Financial System. These amounts reflect demand based on CO₂ removal and sequestration requirements under the NGFS's 1.5°C and 2.0°C scenarios. Both amounts reflect an assumption that all CO₂ removal and sequestration results from carbon credits purchased on the voluntary market (whereas some removal and sequestration will result from carbon credits purchased in compliance markets and some will result from efforts other than carbon-offsetting projects).

Voluntary Carbon Credits

PUTTING A PRICE ON EMISSIONS

Carbon Credit

also known as a carbon offset

One carbon credit

=

One tonne of CO₂ equivalent emissions that can be offset

- Used by individuals, corporations, and institutions to **voluntarily** compensate for their emissions
- Represents the **avoidance, reduction, sequestration, or removal** of one tonne of CO₂ equivalent from the atmosphere
- Emission reduction and removal activity can **only be claimed once**, by the party retiring the credit
- Based on **verification criteria** set by independent standards bodies
- Can have **associated co-benefits**, e.g. job creation, healthcare and preservation of biodiversity

Voluntary Carbon Markets by Project Category¹

- Forestry & land use (46%)
- Renewable energy (43%)
- Energy efficiency / Fuel switching (2%)
- Waste disposal (2%)
- Household devices (2%)
- Other (5%)

Avoidance / Reduction Projects

Avoided Deforestation

Renewable Energy

Methane Capture

Removal / Sequestration Projects

Reforestation / Afforestation

Direct Air Capture and Storage

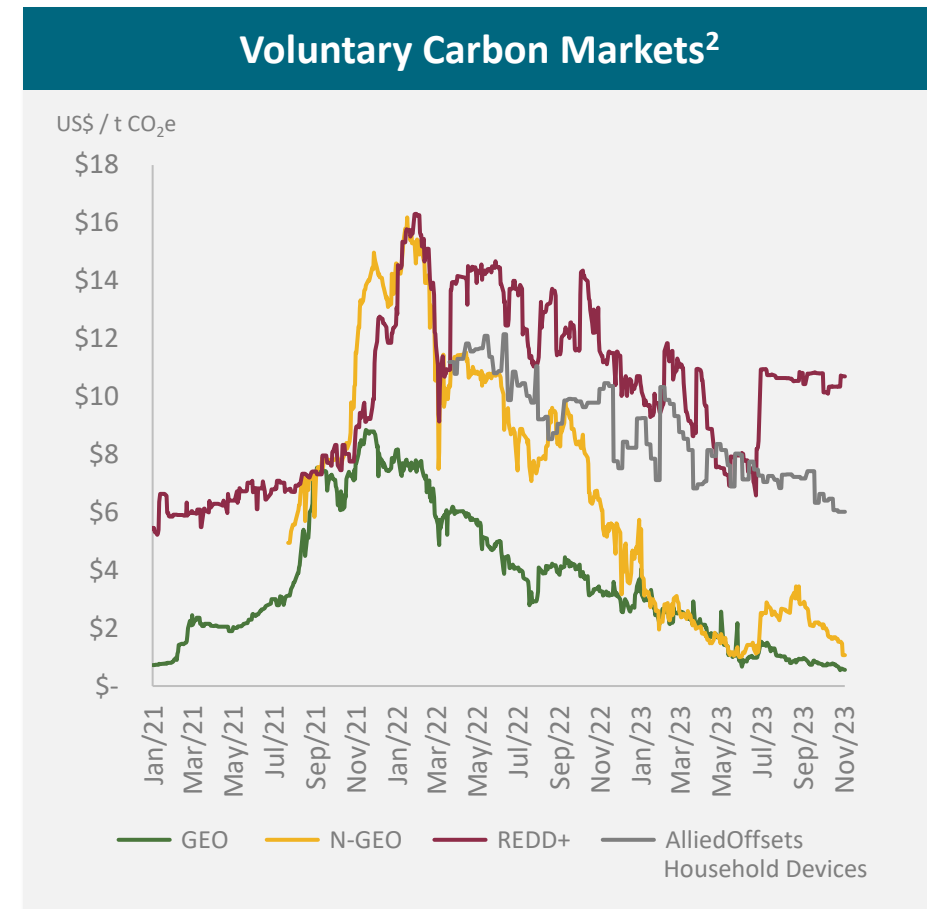

Biochar

¹ Source: Ecosystem Marketplace: Data for 2021. Weighted based on transaction volume.

Prices in the Carbon Markets

REDD+ PRICES HAVE RECOVERED FROM LOWS SEEN IN EARLY SUMMER

¹ Source: Bloomberg; EU ETS = European Union Emissions Trading System, EUAs = European Union Allowances

² Source: ClearBlue Markets, AlliedOffsets; GEO = CBL Global Emissions Offsets, N-GEO = CBL Nature-Based Global Emissions Offset, REDD+ OPIS = Oil Price Information Service pricing for nature-based projects for Reducing Emissions from Deforestation and Forest Degradation.

Higher Carbon Prices are Needed for Net Zero

SUPPLY SIDE SUGGESTS PRICES NEED TO RISE DUE TO THE MARGINAL COST TO DECARBONIZE

Conservation Carbon Abatement Cost Curve¹

Based on current technologies and current costs, assuming economies of scale for technologies in the pilot phase

¹ Source: Goldman Sachs Global Investment Research

² Source: IPCC Global CCS Institute

Carbon Sequestration Cost Curve^{1,2}

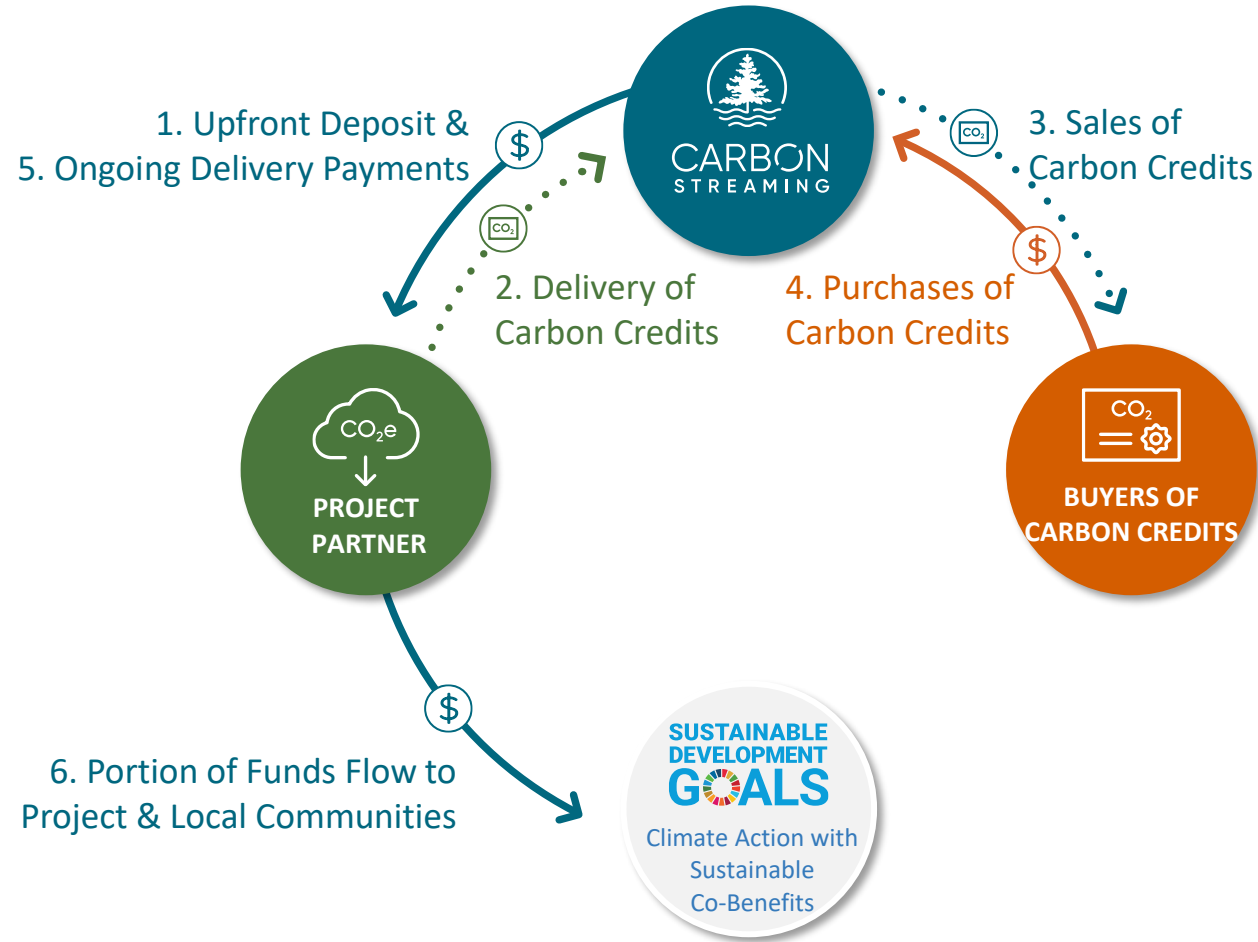

Less steep vs. conservation curve but has higher uncertainty given limited investment to date and the largely pilot nature of these technologies

CARBONOMICS

Proven Partnership Model

ALIGNS INTERESTS TO ACCELERATE CLIMATE ACTION AND ADVANCE UN SDGs

Proven Partnership Model

ALIGNED INTERESTS BENEFIT STAKEHOLDERS

Benefits to Carbon Streaming

- ✓ **Recurring credits** received throughout the term
- ✓ Potential **value appreciation** with purchase terms set upfront
- ✓ **No responsibility** for operating or capital **costs**
- ✓ **Independent verification**
- ✓ Established buffer pools
- ✓ On average, retains ~15-25% of carbon credit revenue¹

Benefits to Project Partners

- ✓ Delivers **upfront cash** to project
- ✓ **Ongoing payments** for life of project
- ✓ **Sales channel** to monetize carbon credits
- ✓ **Maximum value** sought for credit sales with revenue share structure
- ✓ Ability to create or accelerate **tangible co-benefits** when possible
- ✓ **Minimal constraints** on the operator
- ✓ On average, retain ~75-85% of carbon credit revenue¹

Benefits to Credit Buyers

- ✓ Majority of purchase price **flows to projects and local communities**
- ✓ Investment-grade **due diligence**
- ✓ **Diverse and long-term supply** of credits
- ✓ Carbon credits with additional **sustainable benefits**
- ✓ Access to **new approaches to reduce and remove carbon** as portfolio grows

¹ Delivery payment to project developers and timing of credit deliveries or issuance are subject to fluctuation. See Advisories.

Delivering Beyond Carbon

ADVANCING UN SUSTAINABLE DEVELOPMENT GOALS THROUGH IMPACT INVESTING

Preserving Biodiversity

- ✓ Protecting endangered species, such as the bonobos at the Bonobo Peace Forest
- ✓ Protecting marine life at Magdalena Bay
- ✓ Adopting best practices for soil health at Cerrado Biome

Improving Livelihoods

- ✓ Floating healthcare clinic, solar lanterns and water filters at Rimba Raya
- ✓ Providing clean cookstoves and water filters in Africa
- ✓ Establishing new economic opportunities, such as sustainable sea scallop farming at Magdalena Bay

Building Sustainable Communities

- ✓ Scholarships, training and financing micro enterprises for women at Rimba Raya
- ✓ Promoting initiatives that support women in Africa
- ✓ Improving physical and technological infrastructure

Rimba Raya Biodiversity Reserve

WORLD-CLASS TRAILBLAZING PROJECT

Partner	InfiniteEARTH Limited & PT Infinite Earth Nusantara
Location	Central Kalimantan, Borneo, Indonesia
Project type	REDD+ (Avoidance/Reduction)
Credit type (Registry ID)	SPE-GRK ¹ (SRN REG-11-RE-XI-2022-10734)
Status	Registered, validated
Project start year	2009
Expected project life	64 years (2009-2073)
Upfront deposit ²	\$57.8 million
Stream term	Life of project credits
Expected project avg annual credits issued ³	~2.7 million

- One of the world's largest **REDD+ projects**
- **First REDD+ project** and **first "triple-gold"** Climate, Community and Biodiversity project independently validated by Verra
- **First REDD+ project** to be validated under the Indonesian **SRN**
- Preventing tropical peat swamp forests from being converted to palm oil plantations
- Historical credit purchases from Gucci, PwC, Zurich Insurance and many other large corporations
- Significant impact beyond carbon:
 - ✓ Protecting > 600 species of flora/fauna and 100 local animal species, including the Bornean Orangutan
 - ✓ Portion of revenue from the sale of credits supports community development and infrastructure
 - ✓ **ONLY** project **verified** under the Sustainable Development Verified Impact Standard for contributing to **all 17 UN SDGs**.

Rimba Raya
BIODIVERSITY RESERVE

InfiniteEARTHTM
Beyond Carbon. Beyond Sustainability.

¹ GHG Emission Reduction Certificate

² Includes \$26.3M in cash amounts and a \$31.5M share consideration granted under the Strategic Alliance Agreement calculated based on the value of shares as at September 30, 2021 (being the financial period in which the transaction closed).

³ Under the terms of the Rimba Raya Stream, Carbon Streaming has rights to receive 100% of the carbon credits generated by Rimba Raya over the project's life, less up to 635,000 carbon credits per annum that are already committed to previous buyers. The foregoing is subject to change based on Sistem Registri Nasional Pengendalian Perubahan Iklim ("SRN") registry or other developments.

Sustainable Community

QUEBEC AND ONTARIO SUSTAINABLE COMMUNITY PROJECTS

Partner	Will Solutions Inc.
Location	Quebec and Ontario, Canada
Project type	Energy efficiency, waste diversion, transport (Avoidance/Reduction)
Credit type (Registry ID)	VCUs (Verra 929 , 3004)
Status	Registered, issuing since 2014
Project start year	2010
Expected project life	20-21 years
Upfront deposit	Up to \$20 million
Initial stream term	10 years
Expected avg annual credits issued attributable to CSC ¹	Up to ~4.4 million
Expected next credit issuance	2024

Will

- **Quebec Project currently one of the largest projects registered with Verra in Canada**
- Grouped projects enroll and reward members for GHG emission reductions through waste diversion, conversion and energy efficiency initiatives; plans to expand into transport
- Developed the Verra certified [VM0018 methodology](#)
- Projects expected to reduce **>100 Mt CO₂e over next 10 years**
- Carbon Streaming to receive 50% of VCUs generated, up to **44.1 million** carbon credits, and will make ongoing delivery payments
- Option to renew for another 10 years
- First delivery of carbon credits expected in 2024
- Premium carbon credit pricing expected due to **desirable jurisdiction** and high proportion of emission reductions from **methane avoidance** projects
- Contributing to **six UN SDGs**

¹ Under the terms of the Sustainable Community Stream, the Company is to receive up to 44.1 million credits, which is expected to occur within 10 years and the Company has the option to extend the stream for additional consideration.

Community Carbon

BRINGING ENERGY EFFICIENT SOLUTIONS TO MILLIONS IN AFRICA

Partner	Community Carbon
Location	Uganda, Mozambique, Tanzania, Zambia, Malawi
Project type	Cookstove, water purification (Avoidance/Reduction)
Credit type (Registry ID)	VERs, VCUs (GS 11211 , 10967 , 10968 , 11245 , 11320 , 11320 ; Verra 2676)
Status	Under development
Project start year ¹	2020-2023
Expected project life	15-21 years
Upfront deposit	Up to \$20 million
Initial stream term	15 years
Expected avg annual credits issued	~3.3 million
Expected initial credit issuance	2023

- Diversified portfolio of seven energy-saving projects across five countries
- Goal is to reduce emissions by ~**50 Mt CO₂e** over the 15 to 21 year lives of projects
- Aim to deliver 3.5 million cleaner cookstoves and water purification devices over the next two years
- Targeting **nine UN SDGs**
- Establishment of **Impact Fund**
 - ✓ Jointly funded by Community Carbon and Carbon Streaming with percentage of carbon credit sales revenue
 - ✓ Future initiatives to include education and empowerment of women and girls, a demographic known to be disproportionately impacted by climate change

¹ Project Start Years: 2020 for Uganda cookstove and water purification projects; 2021 for Mozambique cookstove and Malawi water purification projects, 2022 for Tanzania cookstove projects, and 2023 for Mozambique and Zambia water purification projects.

Sheep Creek Reforestation

U.S.-BASED POST-WILDFIRE REFORESTATION REMOVALS PROJECT

Partner	Mast Reforestation
Location	Montana, USA
Project type	Post-wildfire reforestation
Credit type (Registry ID)	FMUs ¹ (CF ²³)
Status	Listed ²
Project start year	2022
Expected project life	100+ years
Upfront deposit	Up to \$3.78 million
Number of issuance phases	2
Expected total carbon removal credits issued	~225,000
Expected timing of credit issuance	2025, 2026

- **Up to \$3.78 million** for Sheep Creek Reforestation, the first stream under an **up to \$15 million Pipeline Agreement** with Mast Reforestation
- Restoring more than **2,700 acres** at Sheep Creek Ranch that was severely burned during the 2021 Harris Mountain Fire
- Expected to **remove 225,000 tCO₂e** and generate an equivalent number of Forecasted Mitigation Units (FMUs)
- Carbon Streaming to receive 100% of FMUs, less pre-committed credits, and make ongoing delivery payments. Mast Reforestation **pre-sold** credits at premium pricing from a similar project in 2022 to buyers including Shopify and Time CO₂
- Climate Action Reserve's **Climate Forward Program**
 - ✓ FMUs generated using a methodology specifically intended for forward financing
 - ✓ FMUs can be converted to Climate Reserve Tonnes with ex-post monitoring and verification, or retired to mitigate future anticipated emissions

¹ FMUs are Forecasted Mitigation Units issued under Climate Action Reserve's Climate Forward program.

² First of two project phases listed.

Carbon Streaming Portfolio

DIVERSIFIED PORTFOLIO COVERING 23 PROJECTS OVER 8 PROJECT TYPES IN 12 COUNTRIES

Magdalena Bay Blue Carbon

Baja California Sur, Mexico

Mangrove forest and associated marine habitat conservation

- ✓ ~22,000 ha of mangroves
- ✓ Development Stage
- ✓ ~0.8 million carbon credits per year¹
- ✓ Carbon credit stream to purchase greater of 300,000 credits or 30% of annual carbon credits each year

Cerrado Biome

Cerrado Biome, Brazil

Protect native forests and grasslands from converting to commercial agriculture

- ✓ ~11,000 ha currently, plans to scale
- ✓ Initial carbon credits issued in 2023
- ✓ ~0.5 million carbon credits per year¹
- ✓ Initially to generate 0.1 million credits per year; expected to scale up to an average of 0.5 million per year¹

Biochar Projects

Virginia and Maine, USA

Creating a stable, near-pure form of carbon which sequesters for centuries

- ✓ Two U.S.-based projects
- ✓ Created when biomass undergoes pyrolysis
- ✓ CORCs² are generated from biochar's ability to store carbon & prevent the release of CO₂ into the atmosphere
- ✓ ~13,400 CORCs per year^{1,2}

Nalgonda Rice Farming

Nalgonda District, Telangana State, India

Reducing GHG emissions by improving rice cultivation practices

- ✓ Methane avoidance grouped project
- ✓ ~35,000 ha enrolled and growing
- ✓ ~300,000 to 400,000 carbon credits per year¹ for seven years; option to renew
- ✓ Validation expected to be complete in 2023E

¹ Represents expected average annual carbon credit generation for the project(s).

² CORCs are CO₂ Removal Certificates issued under the Puro.earth standard.

Creating A Portfolio of High-Quality Credits

INDEPENDENT VERIFICATION SUPPLEMENTED WITH DETAILED DUE DILIGENCE

Life Cycle of a Voluntary Carbon Credit

Project Design

Project design and methodology for quantifying GHG emission reductions or removals submitted to registry

Project Validation

Third-party auditor conducts an independent review and presents their report to the registry for approval

Project Development

After receiving registry approval and initial funding, project is developed

Verification

Third-party auditor verifies net GHG emission reductions and removals and carbon credits are issued

Issuance / Transfer / Retirement

Registry tracks the issuance, transfer and retirement of carbon credits

How We Ensure Credit Integrity

- ✓ Seek project partners with a successful track record
- ✓ Projects to be validated and verified in accordance with recognized standard
- ✓ Undertake technical, financial and legal due diligence
- ✓ Engage third party auditors

Consensus Price / Net Asset Value^{5,6}

Significantly **undervalued** compared to other streaming and royalty companies

¹ Capital structure as at November 14, 2023.

² Market capitalizations based on closing share price on November 10, 2023 and exchange rate of US\$1.00 for every C\$1.38.

³ Enterprise value based on market capitalization on November 10, 2023 less cash balance as of September 30, 2023.

⁴ The weighted average exercise price of the 12,309,539 C\$ denominated warrants is C\$6.10 and the exercise price of

20,921,250 US\$ denominated warrants is US\$7.50, respectively.

⁵ Company reports, S&P Capital IQ consensus estimates as of November 10, 2023.

⁶ Precious metals royalties average includes GRO,MTA,OR,SSL,TFPM. Base metals royalties average includes ALS,ECOR. Oil & gas royalties average includes BSM,FRU,KRP,PSK,STR,TPZ,VNOM.

Investment Highlights

**Unique
Approach to
Climate Action**

**Near-Term
Organic
Growth**

**Technical &
Financial
Expertise**

**True ESG
Impact
Investing**

Milestones Achieved & Outlook

- ✓ 2023A: First carbon credits received from stream and royalty portfolio
- ✓ 2023A: First carbon credit sales from streams & first receipt of royalty payments
- ✓ 2023A: Strong cash balance and cost reductions implemented
 - Focus on monetizing carbon credits through spot and forward sales
 - Continue portfolio expansion and diversification with a focus on carbon removal credits

Attractive valuation with shares trading at **0.26x price to net asset value**¹

¹ Consensus analyst net asset value (NAV) estimate and share price as of November 10, 2023; based on exchange rate of US\$1.00 for every C\$1.38.

Appendix

A long-exposure photograph of a rocky stream flowing through a forest. The water is blurred, creating a smooth, white flow over dark, jagged rocks. The surrounding forest is lush with green moss and foliage. The word 'Appendix' is overlaid in white text on the left side of the image.

Key Milestones

Carbon Credit Streaming and Royalty Agreements

Stream / Royalty	Project Description	Total Upfront Deposit ¹ (US\$)	Expected Initial Crediting Period of Stream or Royalty ²	Registry ID
Rimba Raya Stream	One of the world's first and largest initiatives to protect tropical lowland peat swamp forests	\$57.8 million ³	50 years ⁴	SRN REG-11-RE-XI-2022-10734
Magdalena Bay Blue Carbon Stream	Blue carbon mangrove forest and associated marine habitat conservation	\$7.8 million	30 years	Verra TBD
Cerrado Biome Stream	Scale up project to avoid the conversion of native forest and grasslands to commercial agriculture in the Cerrado Biome	\$0.5 million	30 years	Verra 2465
Waverly Biochar Stream ⁵	Reduction of GHG emissions through establishing and maintaining a thermal wood conversion facility where waste fines and sawdust will be converted into biochar	\$3.0 million	25 years	Puro.earth TBD
Sustainable Community Stream (2 Projects)	Grouped projects enroll and reward members for GHG emission reductions through waste diversion, conversion and energy efficiency initiatives, with plans to expand into transport	\$20.0 million	10 years	Verra 929 , 3004
Community Carbon Stream (7 Projects)	Portfolio of energy-saving projects, deploying cookstove and water purification devices. The cookstove projects are located in Mozambique, Uganda and Tanzania and the water purification projects are located in Malawi, Mozambique, Uganda and Zambia	\$20.0 million	15 years	GS 11211 , 10967 , 10968 , 11245 , 11320, 11320; Verra 2676
Nalgonda Rice Farming Stream	Sustainable rice farming grouped project reducing methane emissions, and water and energy consumption	\$2.4 million	7 years	Verra 3238
Enfield Biochar Stream ⁵	Reduction of GHG emissions through construction of a pilot pyrolysis facility using PYREG technology where waste fines and sawdust will be converted into biochar	\$1.3 million	30 years	Puro.earth TBD
Sheep Creek Reforestation Stream	Post-wildfire reforestation	\$3.8 million	2 years ⁶	CF23
Feather River Reforestation Stream	Post-wildfire reforestation	\$0.7 million	1 year ⁶	CF22
Bonobo Peace Forest Royalty ⁷ (2 Projects)	Preservation of the endangered bonobo and their native rainforest habitat, mitigating current threats of deforestation and degradation	\$2.3 million	30 years	Verra 3575 , TBD
FCG Amazon Portfolio Royalty ⁸ (4 Projects)	Protection of native forests and biodiversity from deforestation, located in four states in the Brazilian Amazon rainforest	\$3.0 million	30 years	Verra TBD

¹ Total Upfront Deposit amounts assume all milestones will be realized and all installments paid in full.

² The term of a streaming/royalty agreement commences on the effective date of the agreement. The term extends for the initial crediting period of the stream/royalty and can be extended should the project(s) continue to issue carbon credits beyond the current or expected crediting period of the project.

³ Includes \$26.3M in cash amounts and a \$31.5M share consideration granted under the Strategic Alliance Agreement calculated based on the value of shares as at September 30, 2021 (being the financial period in which the transaction closed).

⁴ Under the SRN registry, Rimba Raya is expected to have a project lifetime until 2073.

⁵ The Company will also receive a revenue royalty on value of biochar sold.

⁶ Forecasted Mitigation Units expected to be issued in approximately 2025 and 2026 for Sheep Creek and in approximately 2025 for Feather River under Climate Action Reserve's Climate Forward program.

⁷ The Company has a 5.99% royalty over the carbon credit revenue generated from the Bonobo Peace Forest Projects.

⁸ The Company has a 5% royalty over the carbon credit revenue generated by Future Carbon from its interest in the FCG Amazon Portfolio.

High-Integrity Carbon Credit Requirements

Additionality

Projects are unable to exist without revenue derived from carbon credits.

Verification

Monitored, reported, and verified by a credible third-party.

Permanence

Carbon reduction or removal will not be reversed.

Measurability

Calculated according to scientific data through a recognized methodology.

Avoid Leakage

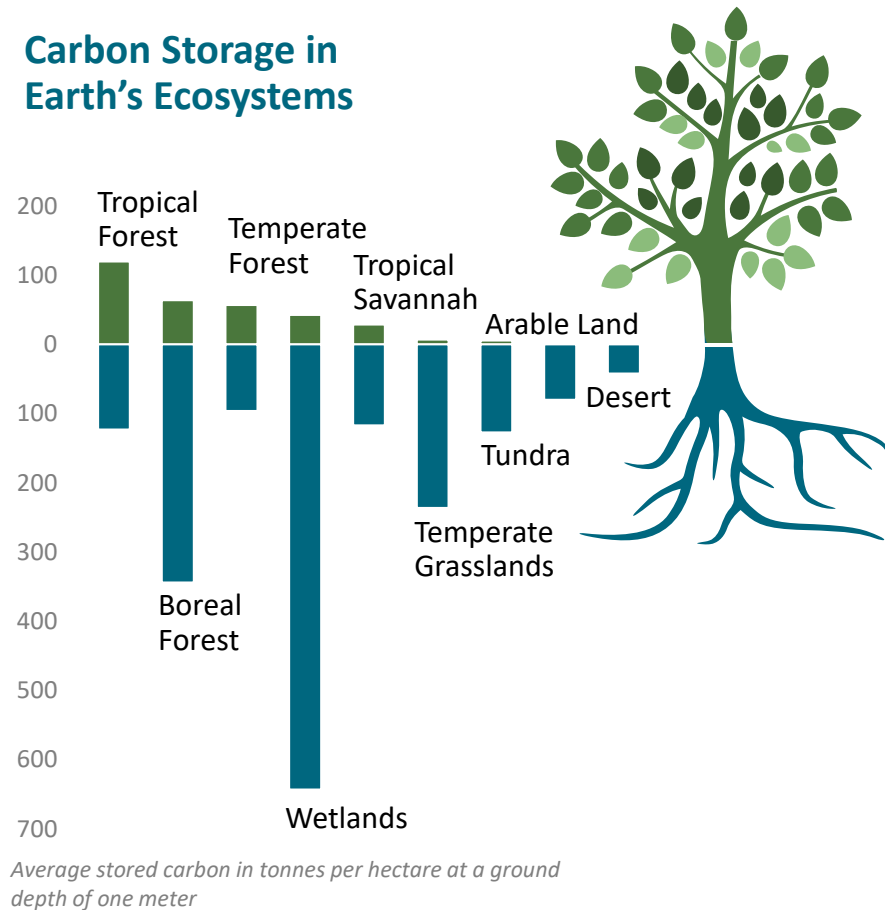

An increase in emissions should not occur elsewhere, or account for any that occur.

Supporting Natural Carbon Sinks

PROTECTING THE EARTH'S FORESTS IS IMPERATIVE TO ACHIEVING NET ZERO

Carbon Storage in Earth's Ecosystems

Sources: IPCC; NASA; Our World in Data

United Nations Framework Convention on Climate Change

UNFCCC created the REDD+ (Reducing Emissions from Deforestation and forest Degradation) framework to measure and value natural carbon stocks as they change over time

Earth's forests absorb **~15.6** Gt CO₂ per year

Deforestation, fires and other disturbances release **~8.1** Gt CO₂ per year

This is **~8x** annual CO₂ emissions from the global aviation industry

As a country, this amount represents **2nd** largest emitter behind China
